Subject: Contact Tracing and Surveillance in Clusters and High Risk Areas

Reference subject mentioned this is to inform you that during pandemic of Covid-19, contact tracing and surveillance of suspected cases in the cluster and high risk areas is of paramount importance in order to prevent the spread of Covid-19.

In order to ensure the activity of contact tracing of the positive cases and surveillance for suspected cases be done scientifically, the epidemiologists under IDSP be assigned this duty and the data of contact tracing be shared with State HQ daily by the district teams. District epidemiologists should use the teams of RRTs in districts to ensure that the contacts are traced and SOPs of Govt of India are followed for the activity.
